PII: S0960-0760(98)00130-7

SUBJECT INDEX

ACTH
effects of prolonged, -stimulation on adrenocortical cholesterol reserve and apolipoprotein E concentration in young and aged Fischer 344 male rats, 335
endogenous ouabain secretion in man is not regulated by, 151
Adrenal tissues
coexpression of P53 and tissue transglutaminase genes in human normal and pathological, 27
Androgen(s)
receptor(s)
hormonal regulation of the, expression in human prostatic cells in culture, 319
quantitation of, messenger RNA from genital skin fibroblasts by reverse transcription—competitive polymerase chain reaction, 35
Antiestrogen(s)
effects of partial versus pure, on ovulation and the pituitary-ovarian axis in the rat, 247
Apolipoprotein E
effects of prolonged ACTH-stimulation on adrenocortical cholesterol reserve and, concentration in young and aged Fischer 344 male rats, 335
Aromatase
expression and activity of, in the human leukaemic cell line FLG 29.1, 105
Aromatase inhibitors
in advanced breast cancer: mechanism of action and clinical implications, 1

Breast cancer
aromatase inhibitors in advanced, mechanism of action and clinical implications, 1
human estrogen sulfotransferase (hEST1) activities and its mRNA in various, cell lines, 295
influence of treatment with onapristone on the IGF-system in, patients, 159
regulation of a promoter of the fibroblast growth factor 1 gene in prostrate and, cells, 93

Corticosterone
effect of oleoyl-estrone administration on, binding to tissues of lean and obese Zucker rats, 165
Cytochrome(s) P450
molecular modelling of steroidogenic, from families CYP11, CYP17, CYP19 and CYP21 based on the CYP102 crystal structure, 217

Dehydroepiandrosterone
effect of, on vaginal and uterine histomorphology in the rat, 137
Dexamethasone
accumulation of, in mouse fibroblasts, 11
treatment with, alters the patterns of basal and acute phase response-induced expression of acute phase protein genes in rat liver, 347
1,25-Dihydroxyvitamin D_3
receptor(s)
localization of, expression in human prostate, 121

Estradiol
regulation of estrogen receptor mRNA STABILITY by, 113
Estrogen
effect of, on IL-1β promoter activity, 203
receptor(s)
estradiol regulates, mRNA stability, 113

Fibroblast growth factor 1 gene
regulation of a promoter of the, in prostate and breast cancer cells, 93
FSH
direct actions of gonadal steroid hormones on, secretion and expression in the infantile female rat, 71

Glucocorticoid(s)
differential gene induction by, 171
influence of calf serum on, -responses of certain progesterone derivatives, 211
modulation of TAT gene induction by, involves a neutralizing sequence, 79
receptor(s)
phosphorylation of, using yeast, 303
β-Glucuronidase
is not required for transfer of [^{3}H]estrone-[^{14}C]glucuronide across guinea pig fetal membranes, 63

3β-Hydroxysteroid dehydrogenase/isomerase
site-directed mutagenesis identifies amino acid residues associated with the activities of human type 1, 327
11β-Hydroxysteroid dehydrogenase
evolution of mammalian, 355
17β-Hydroxysteroid dehydrogenase
overview of a rational approach to design type I, inhibitors without estrogenic activity, 179
type 2, evolution of mammalian, 355
25-Hydroxyvitamin D
concentrations of, in plasma are inversely associated with blood pressure of Dahl salt-sensitive rats, 255

IGF-system
influence of treatment with onapristone on, in breast cancer patients, 159
IL-1β promoter activity
effect of estrogens on, 203

Leukaemic cell line FLG 29.1
aromatase expression and activity in the human, 105
Leydig cells
effect of acute stress and opioid antagonist on the activity of NADPH-P450 reductase in rat, 51

Mouse fibroblasts
dexamethasone and triamcinolone acetonide accumulation in, 11

Ouabain
endogenous, secretion in man is not regulated by ACTH, 151

P53
coexpression of, in human normal and pathological adrenal tissues, 27
Pituitary adrenal axis
arginine-vasopressin and corticotropin-releasing hormone are sequentially involved in the endothelin-1-induced acute stimulation of the, in rat, 45
Progesterone
receptor(s)
differential gene induction by glucocorticoid and, 171
Promegestone
effect of, on sulfotransferase (hEST1) and its mRNA in various breast cancer cell lines, 295
Prostate
hormonal regulation of the androgen receptor expression in human, cells in culture, 319
localization of 1,25-dihydroxyvitamin D_3 receptor (VDR) expression in human, 121
Prostate cancer
control of the proliferation of, cells by an androgen and two antiandrogens, 235
regulation of a promoter of the fibroblast growth factor 1 gene in, cells, 93

Receptor(s)
androgen(s)
hormonal regulation of the, expression in human prostatic cells in culture, 319
estrogen(s)
estradiol regulates, mRNA stability, 113
glucocorticoid(s)
phosphorylation of, using yeast, 303
progesterone
differential gene induction by, 171
vitamin D
association of, with the nuclear matrix of human and rat genitourinary tissues, 241
direct repeat 3-type element lacking the ability to bind to the, enhances the function of a vitamin D-responsive element, 263
expression in human prostate, 121
expression of, in HL-60 cells, 193
5α-Reductase
cloning, expression and characterization of rhesus macaque types 1 and 2, 271
mRNA
of sulfotransferase in human breast cancer cells, 295

Sex hormones
interaction of, and cholesterol with monolayers of dipalmitoylphosphatidylcholine in different phase state, 55
Skin fibroblasts
quantitation of androgen receptor messenger RNA from genital, by reverse transcription—competitive polymerase chain reaction, 35
Sulfotransferase
human estrogen, activities and its mRNA in various breast cancer cell lines, 295

TAT gene
modulation of, induction by glucocorticoids involves a neutralizing sequence, 79
Thymulin
in vitro and *in vivo* effects of, on rat testicular steroid synthesis, 129
Tissue Transglutaminase
coexpression of, in human normal and pathological adrenal tissues, 27

Vitamin D
in vivo metabolism of the, analog 22-oxacalcitriol—evidence for side-chain truncation and 17-hydroxylation, 281
receptor(s)
association of, with the nuclear matrix of human and rat genitourinary tissues, 241
direct repeat 3-type element lacking the ability to bind to the, enhances the function of a vitamin D-responsive element, 263
expression of, in HL-60 cells, 193

We would like to express our deep thanks to the following persons for their kind collaboration in reviewing papers for this volume of **The Journal of Steroid Biochemistry & Molecular Biology**:

CLAESSENS F., London, England, U.K.; **COOK T. A.,** Darlinghurst, Australia; **DeFRANCO D.,** Pittsburgh, U.S.A.; **GROSTENDORST J.,** Leiden, The Netherlands; **HARRIS S. E.,** San Antonio, U.S.A.; **HEERY D. M.,** London, England, U.K.; **HUTSON J. C.,** Lubbock, U.S.A.; **LEVITZ M.,** New York, U.S.A.; **McLESKEY S. W.,** Washington, U.S.A.; **PERI A,** Florence, Italy; **RUSSELL D. W.,** Dallas, U.S.A.; **SCHETTINO V.,** Florence, Italy; **SIMARD J.,** Quebec, Canada
